

In response to your request for public comment Re: "Localism" campaign, I am OPPOSED to the proposed expansion in service of Low Power FM(LPFM)which would allow LPFM stations to take priority over current FM translator service. I am OPPOSED to this proposed expansion for the following reasons: (1)I am currently served by K-Love radio which is often heard on FM translators across the Country and which serves my local community as well as many local communities nation-wide. (2)It would be detrimental to me and my community if a national service like K-Love were to be displaced by an LPFM broadcaster offering other programming. (3)A national service provider like K-Love provides a service that is in the public interest and which is not available from other providers.
